

Verifier and Method for Unknown Spacing Rule Checking

ABSTRACT

Disclosed are a verifier and method for dimension rule check. By
5 checking all basic units in a database and the basic units related to
the bulk according to predefined spacing rules, a warning set within
the database can be distinguished from those basic units checked
by spacing rules. The warning set can specify where or what may be
ignored by the spacing rules and should be concerned to refine the
10 spacing rules.
